XM6003 Front 17x3,50 40 Spokes
XM6004 Rear 17x8,00 48 Spokes

COLOURS: Matt Black, Silver

Ultralite and *Tailor-made* options are available for personal commissioning of rim size, colours, finish and more bespoke features.

The high grade aluminium rim is cold machined by proprietary spinning process without welding, and finished on CNC lathe. This technology ensures a perfectly circular, lightweight rim with limited run out. The hub is CNC machined from billet of solid aluminium alloy.

Spokes are stainless steel with the exclusive 'ONLY-SPOKES' system that eliminates nipples and reduces weight in the peripheral area. Perfect air tightness is provided by the patented tubeless system. Safer, responsive ride in cornering and acceleration. Available as M-Ray.6 and the stylish M-Ray.9 series with oversized, widely spaced spokes.
